Super Premium Menu Salmon & Zucchini

It's a particularly exquisite, gluten and grain free healthy wet food recipe with high-quality food-grade salmon. It's a complete food for dogs of all breeds in all phases of life. The high salmon content ensures best acceptance and tolerance - also suitable for allergic, nutritionally sensitive and older dogs. The high-quality raw materials are gently heated and carefully processed.

The essential Omega-3 and Omega-6 fatty acids contained in salmon and salmon oil ensure healthy skin and a beautiful, shiny coat. EPA and DHA unsaturated fatty acids have anti-inflammatory effects, support the immune system and the musculoskeletal system (joints, cartilage, tissue), have a pain-relieving effect and can prevent diseases of internal organs such as the heart, liver and kidneys and support healing processes. EPA & DHA also perform important functions in the construction of cell membranes. Since the organism of dogs and cats cannot produce these unsaturated / essential fatty acids itself, they have to be supplied through the diet. Zucchini, amaranth and chia seeds support digestion and metabolism and thus ensure optimal digestibility.

Composition: Salmon 63%; naturally contained salmon broth, 28%; Zucchini 4%; Amaranth 2%; Chia seed 1%; Salmon oil 1%; Minerals & Trace elements 1%; Vitamins; Fatty acids Omega-3 & Omega-6.

Analytical components: Moisture 78%; Crude protein 10%; Crude fat 6,5%; Crude ash 2%; Crude fibre 0,40%.
